

TOFF DARELL B. VERGARA

+63 992 479 1154 | topedarell13@gmail.com | Maramag, Bukidnon, Philippines | github.com/ToffDarell

PROFILE SUMMARY

Fourth-year BSIT student at Bukidnon State University with hands-on experience building web applications, Android apps, and AI-powered systems. I enjoy working across the full stack, from database design to user interfaces, and I am comfortable picking up new technologies when a project calls for it. I am looking for a software engineering internship where I can contribute meaningfully, learn from experienced developers, and grow as a professional.

EDUCATION

Bukidnon State University Bachelor of Science in Information Technology 4th Year · 2026–2027 · Expected Graduation: 2027	2023 – 2027
Bukidnon National School of Home Industries Maramag, Bukidnon · GPA: 93	Senior High School

SKILLS & INTERESTS

Languages: HTML & CSS, PHP, JavaScript, TypeScript, Python (basic), Java
Frameworks: Laravel, React, Express.js, Node.js, Tailwind CSS, Socket.IO, WebRTC, Alpine.js
Databases: MySQL, MongoDB, Supabase
ML & Computer Vision: YOLOv11, OpenCV, PyTorch (basic)
Tools: Git & GitHub, Android Studio, Figma
AI Tools: Claude, DeepSeek, AntiGravity / Gemini, OpenCode

PROJECTS & EXPERIENCE

SafeRide — AI Helmet Detection System YOLOv11 · OpenCV · PyTorch · Django REST · React + TypeScript Built a real-time CCTV-based system that detects motorcycle helmet violations and recognizes license plates accurately, with a Django REST backend and React + TypeScript frontend for live monitoring and violation log management.	Capstone Project
Ka-Buksuan — Anonymous Video Chat Platform Node.js · Express.js · Socket.IO · WebRTC · Supabase - Built a real-time random video and text chat platform for Bukidnon State University students, with interest-based and same-college matching and peer-to-peer WebRTC video. - Implemented built-in moderation through user reports, bans, and rate limiting; deployed live at ka-buksuans.onrender.com.	Personal Project (Live)
PayMonitor — Lending Management SaaS Laravel · MySQL · stanc/tenancy · Spatie · DomPDF - Developed a multi-tenant SaaS platform for lending cooperatives, supporting loan tracking, amortization schedules, and overdue loan management. - Implemented tenant isolation, role-based access control, and automated PDF generation for demand letters and financial reports.	Personal Project
Smart Services — Barangay Document Request System Laravel · MySQL · Alpine.js · Tailwind CSS Developed an online document request system for Barangay North Poblacion residents, allowing them to request barangay documents such as a Certificate of Residency, Certificate of Indigency, and First Time Job Seeker certificate without visiting the barangay hall.	Proposed Project
CPAG Research Archive MongoDB · Express.js · React · Node.js (MERN) Built a full-stack MERN application for organizing and retrieving graduate research documents, with search functionality and structured metadata management.	Academic Project

Borongan City Transit — QR Ticketing System

Client Project

HTML · CSS · JavaScript · PHP · MySQL

- Developed a municipal transport ticketing and fee collection system enabling passengers to pay fares via QR code scanning, manages commuter digital wallet balances, automates route-based fare calculations, and tracks daily city collection logs for transit administrators.

Blackout Esports — Reservation System

Academic Project

PHP · MySQL · JavaScript

- Developed a web-based reservation system for a gaming cafe that allows customers to reserve computers, select session durations, submit payment receipts, and enables administrators to manage reservations efficiently.

Jam's Gadget — Inventory App

Academic Project

Java · Android Studio

- Contributed to an Android inventory management app for a smartphone retail business as part of a three-person development team.
